

Polar alignment pin

Removable plate

Upper layer with large hole for mount and slot for the alignment pin

Removable plate

lower layer with hole for mount fixing screw.
This layer is glued to layer above

Fixed plate

with three plywood lips
This plate is screwed to the top and sides of the three tripod uprights

Top plate layout for typical EQ mount

Most small to medium-sized EQ mounts have a similar design

Check your mount first and measure carefully

Make a card template and check before cutting plywood
