

## Handy Hints & Tips

**1** You can easily create smooth, seamless, streak-free colour gradations with Chameleon Pens. Simply infuse your pen with its Mixing Chamber, then as you colour hold the pen upright (not at a harsh angle) and slightly overlap each pen stroke.

**2** A great technique for colouring fur with markers is to start by adding in texture. A good way to do this is to use a flicking stroke. If you're using Chameleon Pens you can always infuse your pen to add highlights and smooth out any harsh lines.

**3** A fun marker pen colouring technique that you can really experiment with is colour overlays. By colouring over an area you've just coloured with a different colour pen, you can alter the colour tone and even create multi-coloured blends.
